CERAMIC SYMBOLISM

To the *Bag*:

I picked up my Justice Kennedy bobblehead and was baffled by the minimal use of symbolic references. I have since read your explanation in the most recent issue and I don't buy it. I prefer to think that the remaining symbols you selected for him were set free to enjoy their liberty in "its spatial and ... more transcendent dimensions." *Lawrence v. Texas*, 539 U.S. 558, 562 (2003).

THE KOSHER BAGEL FISH

To the *Bag*:

Shocked was I, to learn that Doug Adams' Babel fish (proof of the nonexistence of G-d) had become a Bagel fish. 9 GREEN BAG 2D 319 (2006). I believe in G-d, and I also consume large amounts of bagels, even with fish (since both are parve, though of course only one need be). Now, must I wonder if I have geometrically multiplied my heretofore ignored apostasy?

Do I have a lawsuit against Westlaw and Lexis/Nexis (jointly and severally, of course) for combining to expose me to the bagel fish? Adams is dead and maybe judgment-proof, so I really need to know.

Cordially,
