Ex Post
Baseball cards, vinyl records, snow globes, and fidget spinners all have “value expressible in terms of money.” Even that “priceless” Picasso has a price. Really, almost anything can be reduced to a “value expressible in terms of money.” But in ordinary usage does “money” mean almost everything?

Neil M. Gorsuch

Wisconsin Central Ltd. v. United States,
138 S.Ct. 2067 (2018)
The back cover of our Autumn 2019 issue featured this picture . . .

. . . with this caption: “Coming in 2020. We’ve been waiting a long time for a reason to make this.” Many of our readers assumed, quite reasonably, that this was a preview of a John McLean bobblehead doll. In recent years we have made several bobbleheads of past and present members of the U.S. Supreme Court, and this does look a bit like McLean (which is a relief, since it is indeed supposed to be him), who served on the Court from 1829 to 1861. Speculation began among readers, as it sometimes does when a picture of a new bobblehead appears, about possible symbolic significances of details in the portrayal of the character and of the accompanying accoutrements. One of the
details with which we were most pleased in this instance – mostly because of the numerous interesting and obscure observations invited – was the small volume of the United States Reports under McLean’s left arm. But alas, before we could deliver a clever reveal, astute reader Bryan Gividen did a better job of it than we could have. He took to Twitter and delivered the thread of superbly useful and entertaining reasoning reproduced below.

– The Editors
Latest edition of the Green Bag is promoting its 2020 Bobblehead, which appears to be Justice John McLean. I love this pick, but I think @GB2d may have made a typo (or it is being 14-dimensional-chess clever).

More in the thread. /1
The best part about Justice McLean is his dissent in Dred Scott. It uses standard tools of originalist interpretation to come to the right result. It is a hall-of-fame dissent based on reason and logic instead of prejudice and passion. /2

Dred Scott v. Sandford, 60 US 393 - Supreme Court 1...

of that State by force of its Constitution or laws, is also a citizen of the United States.

I will proceed to state the grounds of that opinion.

The first section of the second article of the Constitution uses the language, "a natural-born citizen." It thus assumes that citizenship may be acquired by birth. Undoubtedly, this language of the Constitution was used in reference to that principle of public law, well understood in this country at the time of the adoption of the Constitution, which referred citizenship to the place of birth. At the Declaration of Independence, and ever since, the received general doctrine has been, in conformity with the common law, that free persons born within either of the colonies were subjects of the King; that by the Declaration of Independence, and the consequent acquisition of sovereignty by the several States, all such persons ceased to be subjects, and became citizens of the several States, except so far as some of them were disfranchised by the legislative power of the States, or availed themselves, seasonably, of the right to adhere to the British Crown in the civil contest, "577" and thus to continue British subjects. (McLinnay v. Coxe's Lessee, 4 Cranch, 209; Inglis v. Sailors' Snug Harbor, 3 Peters, p. 99; Shanks v. Dupont, ibid, p. 242.)

The Constitution having recognised the rule that persons born within the several States are citizens of the United States, one of four things must be true:

First. That the Constitution itself has described what native-born persons shall or shall not be citizens of the United States; or...
Justice McLean also wrote the opinion in Wheaton v Peters. Long before the US reports reported SCOTUS decisions, the Court contracted individuals to report the decisions. Peters was a reporter who revised a previous reporter’s (Wheaton’s) work and reissued the old opinions. /3

With a new addition out, Wheaton realized demand for his copies would drop and he would lose out on new sales. So he sued. Justice McLean wrote for the court and held that individuals cannot hold copyright in the Court’s opinions, giving Peters the win. /4

If you think this seems arcane and outdated, think again. This term, one of my colleagues, Josh Johnson, argued to SCOTUS about the meaning of Wheaton v Peters. Check him out: oyez.org/cases/2019/18-... /5

Which brings me to @GB2d’s potential error. Notice the book Bobblehead McLean is holding? That seems to say US 8 (1834). I think that’s supposed to point to Wheaton v Peters, which was decided in 1834. Here is the problem... /6
When Wheaton v Peters was decided, the US reports still wasn’t around. Peters was still writing reports and making bank, like the contracted reporters before him. Every time a new reporter came on the scene, the volume numbers started over. /7

When the US reports came around in the late 1800s, it went back and designated the previous volumes with US reports numbers. Which brings us back to Bobblehead McLean... /8
The volume number 8 on the reporter matches the original Peters volume-numbering - not the US volume numbering. But the reporter on the book is styled US, which I think is an anachronistic mismatch. (If the US reports numbering was used, it would be 33.) /9
There is, however, one flaw in Gividen’s reasoning. He assumes he is writing about a picture of a bobblehead. But it is not a bobblehead. It is a snow globe – our first foray into this field of toymaking. We are, however, bringing to snow globes the same design principles that we have long applied to bobbleheads. And so, while Gividen is wrong in one respect (through no fault of his own – from the picture we printed it was not obvious that McLean was awash in filtered water rather than a-bobble in fresh air), his good scholarship and good spiritedness are spot on.
